Ward Supervision of Medical Students / Medical Residents / Rheumatology Fellows

One or 2 months per year I am the 'Rheumatologist of the Month' for Vancouver Hospital. This entails direct supervision of a team including a rheumatology fellow, 1 or 2 internal medicine residents, 1 or 2 medical students (usually 3rd year Clinical Clerks), and often a resident from the division of Physiatry or podiatry. The team sees all hospital consults which I review with them (average of 5 – 7 consults per week). As a team we round on all patients followed in the hospital by the Rheumatology Service Tuesday and Friday mornings (average of 5 – 15 patients followed at any one time). Patients triaged by the Emergency Department to my office are seen by the resident or fellow and reviewed by myself (average of 1 or 2 consults per week). Friday mornings also end with a 'walkabout' with other fellows and rheumatology staff attending weekly presentations of an interesting case.

I estimate the time spent reviewing new patients / rounding on the service / and bedside teaching (usually focused on the patients being presented) to be 10 – 15 hrs. weekly.

'Rheumatologist of the Month' averages 6 weeks annually.

Supervision of Rheumatology Fellows at GF Strong Arthritis Inpatient Service

All Rheumatology Fellows spend 2 months of their training at GF Strong Centre. This is an inpatient service focusing upon the rehabilitation of clients with severe rheumatoid arthritis. Approximately 50% of these patients are post-operative from orthopedic procedures. Approximately 20% are afflicted with other rheumatic illnesses including poly / dermatomyositis, systemic lupus erythematosus, systemic sclerosis and various forms of vasculitis. The trainee is responsible for admissions, discharges and all day to day care of a 21 bed ward. New patients are reviewed with staff as are any significant medical concerns. **I perform bedside rounds twice weekly and informal teaching sessions once weekly.**
